

Developed by Stafford Bridge Clear Secure is a lightweight adaptable modular glazing system that gives your facility the protection needed to resist a determined opportunistic attack.

- Tested and certified to LPS 1175 Issue 8 B3 (SR2)
- Form barriers or guided walkthroughs
- Flexible: Option of self-supporting or anchored to an existing wall
- Adaptable: Pass around obstacles using 90° turns

Clear Secure offers an ideal solution where vision and illuminating light are important, yet the physical security of individuals or assets is also required. Independently tested and certified to LPS 1175 Issue 8 B3 (SR2) Clear Secure is proven to withstand determined attacks using tools such as hammers and cutters

Secure Modular Glazing System
