

High Performance Doorsets & Windows for Heritage

Heritage Solutions

Who are we?

Stafford Bridge is an established proven supplier of unique heritage doors and windows. Operating from our UK based production facility, we design, manufacture and install bespoke heritage doorsets and windows that are aesthetically appropriate and provide multi-threat security.

Our business prides itself on providing unique high quality security solutions which not only stand the test of time but also keep the facility secure. This is proven by our commitment to testing our doorsets and windows to appropriate European standards such as LPCB LPS1175 (physical security) or EN1634 (fire resistance). Furthermore, our experience with heritage building projects has seen us build relationships with organizations such as Historic England (formally known as English Heritage) to ensure that our doors and windows match the character of the building and are suitable for use on historic and grade 1/2 listed buildings. Our efforts on specialist heritage projects (in fact on all projects) mean that we go above and beyond to provide our customers with the project satisfaction their building deserves.

TOTAL COMMITMENT, COMPREHENSIVE SERVICE

We offer a comprehensive service to ensure integrity and security:

DESIGN

- * Standard and bespoke packages

Heritage Projects & Organizations

Hart Lane Water Tower - Luton

Stafford Bridge supplied a double leaf Sandhurst doorset with radius head to suit existing building structure to the Hart Lane Water Tower in Luton. The external doorset and frame is constructed from solid oak finished with a stained finish (samples can be supplied). The Sandhurst doorset can be designed to fit most structures and maintain the original aesthetical appeal of more traditional joinery doorsets whilst providing various performance features security, ballistic, blast, fire and acoustic ratings.

To secure the facility a Surelock McGill Slimline multi-point locking system was fitted to the internal side of the door, along with Surelock McGill heavy duty hinges and bolts. To keep the prevailing character of the door the old hinges and external looped door handle were used and the new cylinder guard was painted gloss black to match.

Surveyed, designed, manufactured and installed by our team ensured a successful project and smooth handover for the end user.

These are just some of the organisations we have worked with in the past:
